### Aim of Module

This module aims to provide participants with opportunities to acquire the knowledge and competences that will enable them to develop as effective, reflective and student-centred facilitators of learning.

### Module Learning Outcomes

On successful completion of this module, you will be able to:

- Critique, synthesise and assess the literature in relation to pedagogical principles and practices in the context of further/higher education
- Design, compose and critically apply complex and advanced teaching methods and approaches in order to respond to a wide and often unpredictable range of situations in various pedagogical contexts
- Evaluate a range of pedagogical situations and environment in order to create student centred learning opportunities for the advancement of individuals and groups
- Critically reflect on her/his learning and practice, using a spectrum of theoretical models and effectively articulate these reflections in an integrative and scholarly manner
- Critically self-evaluate in relation to practice, and create plans as well as respond effectively to emerging ideas and experiences for her/his continuing academic and professional development.

### Mode of Assessment

100% Continuous Assessment
