### Aim of Module

This module is designed to ensure supervisors and prospective supervisors of postgraduate students are familiar with the policies, procedures and standards governing this field and to develop a wide range of skills for effective postgraduate supervision.

### Module Learning Outcomes

On successful completion of this module, you will be able to:

- Synthesise the key characteristics of research programme activity and postgraduate awards
- Apply recently published national and international guidelines, standards and legislation to supervision of research
- Identify key funding sources for postgraduate students and write successful funding applications
- Design, implement and manage a research project
- Effectively manage the supervision and research process from start to finish
- Work effectively with the research student, conduct effective supervisory meetings, give appropriate feedback and articulate the supervisor’s role in career planning and professional development.
- Participate effectively in research networks
- Evaluate the concept of research supervision as mainstream teaching activity and outline strategies for the integration of teaching and research
- Evaluate issues relating to supervisor needs during the research process.

### Mode of Assessment

100% Continuous Assessment
